

ESD[®] ACTUATOR APPLICATION DATA SHEET

Flow-Quip ships SCADA Gas Project Valve Automation Systems on Time

As a part of an \$85 million dollar pipeline upgrade, 84 of these compact Flow-Quip skid mounted hydraulic power units were shipped to Mexico for site installation and automation of 94 existing pipeline valves. They provide hydraulic energy for Flow-Quip gate valve and plug valve actuators fitted on each valve.

Solar panels at each valve site are used to provide electrical power for hydraulic energy storage. Each system is connected to the new nationwide SCADA system to allow remote operation of the pipeline.

Type: HPU-SOLAR
