Flow-Quip Hydraulic Power Units ready for Shipment to California Water Pipeline Project

A partial shipment of Hydraulic Power Units is shown ready for shipment to California for block valve automation on a new high pressure water pipeline. Working closely with the California Department of Water resources engineering group, Flow-Quip designed and built eight of these highly sophisticated hydraulic power units (HPU's). All of the HPU's are installed in underground vaults at valve sites and connected to the pipeline DCS system via Modbus communication system. Each HPU contains an extensive PLC control and communication system.

Type: HPU-HYDRAULIC POWER UNIT
